Course Objectives Course Objectives Course Objectives

Percutaneous revascularization of chronic total occlusions (CTO) is without any doubt the most challenging procedure in coronary interventional cardiology. The knowledge of new techniques, as well as new dedicated wires and devices, allow to optimize procedural success also in other complex coronary interventions, in elective or urgent settings. This new edition of CTO Summit in Turin is focused on Live cases, case review sessions and lecture from experts.

Gala Dinner APRIL 6th

19.45 Guided Tour
20.45 Gala Dinner

PALAZZINA DI CACCIA DI STUPINIGI

Piazza Principe Amedeo, 7
Stupinigi, Nichelino (TO)

Residence of the House of Savoy used for hunting and parties whose construction started in 1729 on a project designed by Filippo Juvarra, the Palazzina di Caccia of Stupinigi is one of the artistic masterpieces of Turin, located only 10 km away from Piazza Castello in the city center.

Built on a first piece of land donated by Emanuele Filiberto to the Order of Saints Maurice and Lazarus (1573), today is a property of the St. Maurice Order Foundation, a governmental body established for its preservation and enhancement.

Following major restoration works, the Palazzina di Caccia of Stupinigi, one of the most extraordinary eighteen century building in Europe, finally reopened to the public and it is now a museum displaying its original furniture, paintings, woodworks and the area territorial planning.
